

Aerospace and Defense Purchase Order Requirements

In order to supply you with the best turnaround possible for your aerospace product, we have outlined a handful of requirements which need to be included in your purchase order.

Required PO Information:

- Paperwork to clearly identify the part number
- Quantity of parts on Purchase Order
- Incoming alloy and temper
- Outgoing temper
- Traceability (if required on the certification):
 - Lot Number(s)
 - Serial Number(s)
 - Heat Number(s)
- Any specifications including the revision letters (example: AMS2770P). You may also list the revision as “current revision” (example: AMS2770 Current Rev).
- Special or specific requirements, for example:
 - Recipe
 - Inspection
 - Packaging
 - Tensile testing
 - Batch charts
- Quoted price

Please note: If any of the listed information above is missing, it may result in delays of production.
